Absolutely! A Software Requirement Specification (SRS) document typically includes a detailed description of a software system to be developed. Here's a general format for an SRS document:

1. Introduction

      1.1 Purpose 1.2 Scope 1.3 Definitions, Acronyms, and Abbreviations 1.4 References 1.5 Overview

2. Overall Description

      2.1 Product Perspective 2.2 Product Functions 2.3 User Characteristics 2.4 Constraints 2.5 Assumptions and Dependencies

3. Specific Requirements

      3.1 Functional Requirements 3.2 Non-functional Requirements 3.3 External Interface Requirements 3.4 System Features

4. System Architecture

      4.1 Design Constraints 4.2 Architectural Strategies

5. System Attributes

      5.1 Reliability 5.2 Availability 5.3 Security 5.4 Maintainability 5.5 Portability

6. Use Cases

      6.1 Use Case Diagrams 6.2 Detailed Use Case Descriptions

7. Appendices

      7.1 Glossary 7.2 Analysis Models 7.3 Issues List

8. Index

      Each section contains specific information pertinent to the development and requirements of the software. The document provides a detailed description for developers to understand exactly what needs to be built.

      I hope this gives you a good starting point! Let me know if you need more details on any of these sections.
